SUMMARY

2 years Experienced Front-End Developer, proficient in JavaScript and React workflows, delivering projects with a 90% client satisfaction rate. Specializes in crafting engaging UIs, eager to amplify success in a team-driven environment.

SKILLS AND CERTIFICATIONS

Programming Languages	JavaScript, Java
Web Technologies	React.JS, Redux, Material UI, Ant Design, HTML, CSS, Formik, Restful APIs, Axios, Hooks, Node.JS
Developer Tools	VS Code, Git, Bit Bucket, Postman, Jira, Click Up
Certifications	JavaScript Skill Certification, Data Structures and Algorithms Using Java

EXPERIENCE

React JS Developer   02/2022 - Present
Unthinkable Solutions   *Gurugram, Haryana*

- Created 20+ reusable React components, leveraging JavaScript best practices to improve application performance and streamlined the code base.
- Designed **HOCs** and created custom hooks to promote code re-usability and extract component logic into reusable functions., reducing code duplication by 30%.
- Leveraged React UI frameworks like **Material UI and Ant Design** to enhance UI development efficiency with high-quality responsive components by 25%. Demonstrated strong skills in applying **Redux and Context API** to effectively managing state.
- Engaged in 50+ code reviews and debugging efforts, enhancing application quality by 20%.

PROJECTS

Float Management System

- Streamlined functional components using **React Hooks** to streamline state and lifecycle management, reducing code complexity by 20%.
- Utilized **React Axios** for accessing and managing 20+ Web APIs, enabling seamless data transfer from the back-end and updating the states in the Redux store.
- Implemented **React Hook Form** for forms validation and utilized **Redux** for state sharing across 10+ components, increasing development agility and performance by 10%.

DENSO

- Implemented 10+ interactive React components using React Hooks, State, Props, Forms, and UI libraries like Ant Design for a 30% enhanced user interface for a responsive web application.
- Applied **Formik and Yup** for robust validation across 5+ distinct user input forms and managed React components navigation with **React-Router**.

SOAP Health

- Crafted new screens with TypeScript, improving interface clarity by 20%. Seamlessly integrated a variety of intents with Dialogflow, boosting user interaction by 30% through voice, typing, or clicking for a richer multi-modal experience.
- Enhanced project aesthetics and user experience by integrating **Tailwind CSS**, achieving a responsive design with a 40% faster load time and a 15% increase in user engagement metrics.

EDUCATION

B.Tech in Computer Science Engineering   08/2018 - 06/2022
Bharati Vidyapeeth's College of Engineering , New Delhi
